Hi everyone 🤚,

First of all, thank you for being part of the **AIToolbox** community! 🤝
For those who are new here, **AIToolbox** is your all-in-one AI platform to unlock productivity with tools like:

- AI Email Writer
- AI Translator
- LinkedIn Post Generator
- Image & Logo Generators
- YouTube Summarizer
  ...and much more!
      🔗 https://aitoolbox.software/

Why this issue?

Open source contribution is **not only about writing code** – it's also about **sharing and promoting** the product so more people can benefit.
When you talk about AIToolbox, you're helping us grow the community, get more contributors, and improve the platform faster. 🚀

How you can help 📣

1 Share your posts (LinkedIn/Twitter/X)

- Add your post links to this array:

    - **File:** src/app/(community)/community/data/data.ts
    - **Export:** communityPosts

Example:

```
// src/app/(community)/community/data/data.ts
export const communityPosts = [
  { url: "https://twitter.com/vercel/status/1790418522919100402" },
  { url: "https://x.com/nextjs/status/1790812345678900000" },
  { url: "https://www.linkedin.com/posts/...-activity-7361815034005504000-..."
},
];
```

Notes:

- Only public LinkedIn & Twitter/X URLs are supported.
- Posts will be shown on https://aitoolbox.software/community
- Cache refreshes every ~5 minutes.

---

2 Share your blogs

If you write a **blog/article** about AIToolbox, add it here:

- **File:** src/app/(community)/community/data/Blogdata.ts
- **Export:** blogPosts

Example:

```
// src/app/(community)/community/data/Blogdata.ts
export const blogPosts = [
  { url: "https://medium.com/@yourname/how-i-use-aitoolbox-to-save-time" },
  { url: "https://dev.to/yourname/aitoolbox-productivity-boost" },
];
```

Supported: Public blog/article links (Medium, Dev.to, Hashnode, personal blogs).

Why contribute like this?

- ☑ Your posts & blogs will be **featured on the AIToolbox Community Page**
- ☑ You get **visibility** in the AI & tech space
- ☑ It's a genuine open-source contribution — you're helping us grow

Content ideas for LinkedIn & Twitter/X

We've prepared **post & tweet ideas** so you can personalize and share easily.

> ⚠ do not exact copy paste personalise it with your words!! #### linkdin post ideas

```
1.
I've been testing a lot of AI tools lately, but switching between 10 different
websites was tiring.

Last week I came across AIToolbox — it's basically a collection of AI tools in
one place.

So far, I've used:

Email Writer → helped me reply to client emails quickly

LinkedIn Post Generator → gave me a post outline in less than a minute

Image Generator → made a clean banner for my blog

Code Explainer → turned a confusing JS snippet into plain English

It's been saving me a lot of time, and the best part is I don't need to
```

remember multiple logins or jump between tools.

If you're into content creation, coding, or just want to get tasks done faster,
it's worth a try: https://aitoolbox.software/

2.

Over the past few months, I've been experimenting with different AI tools for
work and side projects.
The problem?
I had 10+ browser tabs open, each for a different AI tool.
Managing them was a nightmare.

Last week, I stumbled on AIToolbox — and it turned out to be the all-in-one
platform I didn't know I needed.

Here's what stood out for me:

AI Email Writer — Writing professional emails now takes me less than a minute.
I give it a short brief and get a polished draft ready to send.

LinkedIn Post Generator — Helps me break through writer's block when I want to
post but have no ideas.

Prompt Generator — Gives me ready-to-use prompts that improve ChatGPT and AI
art results without trial and error.

Image Generator — I made a blog banner in under a minute with just one sentence
of description.

Code Explainer — Explains complex code line-by-line in plain English, saving me
hours of searching.

YouTube Summarizer — Turns 20-minute videos into 2-minute summaries with all
the key points.

What I like most is that everything is under one login.
No need to remember multiple accounts or switch between sites.
I can handle content creation, design, coding, and even travel planning from
the same dashboard.

If you're a creator, developer, marketer, freelancer, or student looking to
save time and get more done, this is worth checking out:

tweet ideas

1. Just tried AIToolbox's AI Email Writer — it drafts clear, professional emails in seconds. Big time-saver. https://aitoolbox.software/email-writer

2. I added the AIToolbox GPT Chatbot to my workflow — it answers questions and drafts ideas instantly. https://aitoolbox.software/gpt-chatbot

3. Struggling to write LinkedIn posts? AIToolbox LinkedIn Post Generator made one for me in seconds. https://aitoolbox.software/linkedin-post-generator

4. I used AIToolbox Image Generator to make visuals for my posts — fast, sharp, and unique. https://aitoolbox.software/image-generator

5. Need better prompts? AIToolbox Prompt Generator gives clear, effective prompts for writing and images. https://aitoolbox.software/prompt-generator

6. I made a clean logo with AIToolbox Logo Generator in minutes. Simple to use and looks professional. https://aitoolbox.software/logo-generator

7. Too long to watch? AIToolbox YouTube Summarizer gives quick, accurate video summaries so I get the key points fast. https://aitoolbox.software/youtube-summarizer

8. Stuck on code? AIToolbox Code Explainer breaks code into easy steps so I understand faster. https://aitoolbox.software/code-explainer

9. I used AIToolbox Blog Writer to draft a clear blog post fast — saved hours on structure and tone. https://aitoolbox.software/blog-writer

10. Updating my CV was easy with AIToolbox Resume Builder — clean format and strong wording suggestions. https://aitoolbox.software/resume-builder

11. Planning a trip? I used AIToolbox AI Trip Planner for a clear travel plan and budget ideas — very handy. https://aitoolbox.software/ai-trip-planner

12. Want project ideas? AIToolbox AI Project Recommender gave me tailored project suggestions based on my skills. https://aitoolbox.software/ai-project-recommender

Let's grow **AIToolbox** together – in both features and reach.
Your contribution here is as valuable as any line of code. ✂

If you want, I can also make a **short, ready-to-paste "Add Your Blog" section** for your `README.md` so contributors don't even need to open this issue to know how to submit.
That would make this process even smoother.
